

Vinyl Cutter Safety Main Points

- The blade is held in the cutting carriage.
- The cutting carriage moves the blade back and forth during cutting.
- Do **NOT** put your hands in the cutting area while cutting is in progress.
- If cutting is not going as planned, do **NOT** try to fix it while cutting is in progress.
- Before making any adjustments select the “**Pause**” button.
- After adjusting, continue cutting by selecting the “Pause” button again.
- If the blade’s force needs to be adjusted, find an Innovation Lab staff member to help you.
- Always handle the vinyl cutter with care to protect it from damage.
- Check with Innovation Lab staff to be sure any non-vinyl materials you want to cut can be cut by the vinyl cutter.
- Set up cutting to begin in the bottom left corner of your material. This helps to minimize waste and protects our resources.
